Midex Time Control
Time and Attendance Software

Midex Time Control is our market-leading, web-based time and attendance software. It schedules, tracks and manages employees' hours at work and exports data to your payroll software.

The process starts when employees punch in and out – from either a standalone time clock or a web time clock – so you can see who is at work, absent, late or who left early. All in real time.

At the end of each pay period, it generates reports (like Time Card), and exports the data to any CSV file format for uploading into your payroll system.

Midex Time Control integrates instantly and seamlessly with touchless, biometric time clocks, giving you an instant snapshot of who is at work. The software creates a data loop between any department, including payroll, HR, finance or operations, making it easy to share information – and easy to save time.

Midex Time Control
Features that Fit the Way You Work

Whether you're a small company or a large corporation, Midex Time Control has all the features you need to track employee time and attendance.

Midex Time Control lets you set rules for attendance rounding, break deductions, overtime, paid time off, sick days, shift scheduling and other parameters. With multi-company support, the rules can be set up on a company-wide basis, by department or even sub-department.

Up-to-the-minute information at your fingertips

Choose Midex Time Control For:

✔ **Unmatched customer support**

✔ **Scalability for companies of all sizes**

✔ **Remote access ... anytime, anywhere for more productivity**

✔ **Reduced manual touchpoints and errors**

✔ **Greater accuracy in tracking and reconciliation**

✔ **Reduced time and costs in creating payroll**

The Midex software eliminates confrontations because it is foolproof, giving real-time information and cannot be tampered with. That gives everyone peace of mind.

Midex Time Control

Some of the Core Features
of Midex Time Control

Reports

Generate reports for time cards, average working hours, missing registrations, actual vs adjusted registration or modification logs, and more. Reports can be printed or exported to PDF or Excel

Export

Generate and export attendance data to CSV or other formats to match any payroll software. You can use pre-defined export templates or design your own for employee punching in and out

Custom reports are
available too – just ask

Optional
Add-On Modules
for More Comprehensive Performance

Shift Schedule Module

Set up shift schedule with additional rounding rules – and see at a glance who is scheduled to work, as well as who is currently at work, absent, late, tardy or left early. Create a schedule in advance so you can plan precisely how many employees need to work per day - and so much more.

Paid Time Off Module

Assign, track and manage holidays, vacations, sick days, etc., and ensure time cards reflect paid-time-off hours to be imported into your payroll. This module includes accruals, which can be set up by total hours, or as a percentage of total hours worked - with an optional carryover to the next year. Additional reports can be generated to review the hours employees have accrued, been assigned and have remaining.

Optional Add-On Modules

for More Comprehensive Performance

Employee Portal Module

Give employees online access to their schedules and time cards through the Employee Portal Module. The Employee Portal module makes it easy to punch in/out via a web time clock, and lets you specify location restrictions by distance from a specific point on a map or by IP address. Geolocation tracks where employees punch in/out.

Midex Time Clocks

The Perfect Complement
to Midex Time Control

The latest biometric technology for accurate, safe touchless registration - the perfect complement to Midex Time Control.

Midex time clocks are the foundation to our time and attendance solutions. They feature the latest recognition technology, while meeting the current demand for touchless devices that promote safety protocols, accuracy, reliability, and secure employee identification.

Our innovative, touchless, biometric time clocks are sourced from leading global manufacturers - and include various combinations of face, palm, fingerprint and password recognition methods. Some models enable face recognition, even when an employee is wearing a mask, or can measure employee temperature at the time of registration.

These innovative, multifunction devices capture data in real time and seamlessly transmit it to Midex Time Control. We have a model for every need.

Innovative Products Backed by Superior Service

Midex is a modern technology software company with a long history of creating innovative time and attendance management systems. Our goal is to help you perform payroll functions efficiently, accurately and affordably with tools that are reliable and easy to use.

Our winning combination of market-leading time clocks and software can be scaled for companies of any size, and just about any industry.

We are a Canadian company, based in Toronto, and have been developing time and attendance software since 2003. We created Midex Time Control more than 10 years ago and have continually improved and modernized its functions and capabilities each year. While our products are praised by our customers, we are also highly regarded for providing unmatched customer support.

The Midex Promise

- Your priorities are our priorities
- We approach each customer on an individual level
- We offer unmatched customer support that lets you focus on your core business

Make payroll easier with innovative time and attendance products – and unmatched customer support

- No-hassle sign-ups
- Free trials
- Free customer support
- No contracts
- 30-day money-back guarantee
