

## HP4000

Standalone Hand Reader Time Clock

*The Schlage HandPunch 4000 and 4000S are Biometric Time Clocks designed for Time and Attendance Software. With a HandPunch, there are no cards to create or administer, and users' credentials can't get lost, stolen or duplicated without authorization. Since the user is identified by hand geometry costly "buddy punching" is eliminated. No fingerprints or palm prints are used, and the HandPunch even works effectively in environments where the user's hand or the device may get dirty, dusty or damp.*

- *Allows easy use with Midex Time Control.*
- *Supports 530 – 3,498 users*
- *Antimicrobial coating on the platen helps inhibit the growth of bacteria, mold and fungi, and remains active for the life of the device.*
- *Bell signal output and schedule*
- *Employee's name displayed on the LCD*
